List of books in this series	xxvii
1 The jigsaw of reform: pushing the parameters <i>Robert Jones and Fiona Jenkins</i>	1
The jigsaw of reform	1
Providers of care – by whom to whom and where?	2
Technology	3
Changes in organisation	3
Clinical heads of clinical services	4
Culture	4
Pushing the parameters	5
Beware of pitfalls, fads and whims	5
Shaping tomorrow – break the rules that stifle change	6
Leadership	6
Social movements	7
Is everyone the architect of their own future?	8
References	8
2 Money, money, money: fundamentals of finance <i>Robert Jones and Fiona Jenkins</i>	10
Introduction	10
NHS funding and key policy developments	11
What is the money spent on?	11
Costing and pricing	13
Definitions	14
Budget	14
Cost	15
Hierarchy of costs	17
Payment by results	17
Market forces factor	18
Staff establishment	19
Cross charging	19
Cost improvement programmes	19

Private finance initiative	19
Charitable funds	20
Standing financial instructions	20
EBITDA	20
Service line reporting	20
Patient level costing	21
Practice based commissioning	21
Foundation trusts	22
Monitor	23
Summary	23
References	24
<b>3 Commissioning for health improvement: policy and practice</b>	<b>25</b>
<i>Gerry McSorley</i>	
Introduction	25
The approach to health policy implementation within the four countries of the UK	25
Background to the position in England	26
Strategic commissioning	28
Developing strategic commissioning	30
Practice based commissioning	30
The commissioning cycle	32
Leadership in commissioning	34
What if the model as conceived does not deliver?	35
Conclusion	35
References	35
<b>4 Striking the agreement: business case and service level agreements</b>	<b>37</b>
<i>Robert Jones and Fiona Jenkins</i>	
Introduction	37
Guidance for business case development	38
Purpose of the business case	38
Option appraisal	38
Key elements in a business case	39
Service level agreements	41
Memorandum of agreement	42
Conclusion	51
References	51
<b>5 Thriving in the cash strapped organisation</b>	<b>52</b>
<i>Rosalie A Boyce</i>	
Financial autonomy and professional power	52
Finance models and the politics of value	53
Drivers for change in financial models	54
Technical and creative skills as complementary elements – style and substance	55

The funding scenario	56
Getting the preliminaries right	57
A negotiation unfolds	58
A smorgasbord of strategies	59
References	60
<b>6 Information is power: measure it, manage it</b>	<b>63</b>
<i>Robert Jones and Fiona Jenkins</i>	
The development of IM&T for AHPs	63
NHS Connecting for Health	64
Computerised systems for AHP services	65
Principles for computerised information systems for AHP services	66
Using the information	68
Reports	69
Examples of reports	70
Example 1. Monitoring number of out-patients waiting	70
Example 2. Monitoring activity	70
Example 3. Monitoring out-patient new to follow up ratio	71
Example 4. Research and audit presentation of results	71
AHP referral to treatment reporting	71
Time is money – how do we spend it?	72
Tips for implementation	73
Therapy services activity sample proforma	75
Example of reports from activity sample	76
Summary	76
References	78
<b>7 Information management for healthcare professionals, or what has IT ever done for us?</b>	<b>80</b>
<i>Alan Gillies</i>	
Introduction	80
What can IT do for me and my patients?	81
More effective and efficient record keeping	81
Access to best evidence	83
Reduction of potential adverse events	85
What do I have to do to use IT properly?	86
Competence in using IT to maintain records	86
Consent and confidentiality	87
Data protection	90
References	94
Useful websites	95
<b>8 Allied health records in the electronic age</b>	<b>96</b>
<i>Margaret Hastings</i>	
Understanding systems	97
A glossary of some information technology terms	98
Information management	100

Information governance	102
Caldicott Guardian	103
Records management	103
General record keeping principles	104
About data	105
What data?	106
Identifying the right service user	106
Consistent, valid and accurate data	106
Terminology	107
Classification	108
Datasets	108
Using data	109
Benefits of moving to electronic records	109
References	110
9 Data 'sanity': reducing variation	112
<i>Davis Ballestracci</i>	
Introduction	112
Data 'sanity': statistical thinking applied to everyday data	112
A key concept: process-oriented thinking	113
The use of data is also a process	114
Measurement	114
Collection	115
Analysis	115
Interpretation	116
A high level summary of improvement: six sources of problems with a process	117
More data 'sanity': statistics and reality	117
Research versus improvement	117
Unknown and unknowable	118
A treatment declared as beneficial: so...what changes?	118
Further clarification: enumerative statistics versus analytic statistics	119
Statistics in a quality improvement perspective	120
The very basics of process-oriented statistics	120
Old habits die hard...hang in there and read on!	120
Plotting the dots – common and special causes	124
The quality improvement goal	125
Run charts	126
So...does 'common cause' mean we have to live with it?	128
Think of a 'rejected batch' as: an undesirable situation that was unsuccessfully avoided!	128
Summary	129
References	130
10 Outcome measurement in clinical practice	131
<i>Ann P Moore</i>	
Introduction	131
So what is an outcome measure?	132

So who are the stakeholders?	133
What are the stakeholders interested in?	133
Why are outcome measures important?	134
So what outcome measures can be used?	137
What are the problems associated with the measurement of outcomes?	138
Summary	140
References	140
Further reading	141
11 Benchmarking AHP services	142
<i>Fiona Jenkins and Robert Jones</i>	
Benchmarking your service	142
Introducing our AHP benchmarking tool	142
How to use the tool	142
The benchmarking 'toolkit'	143
Briefing notes	143
Section 1 your organisation – general information	149
Section 2 your professional group and staffing	149
Section 3 in-patient services	149
Section 4 out-patient services	150
Section 5 community services	151
Reference	152
12 Management quality and operational excellence	153
<i>Stephen E Chick, Arnd Huchzermeier and Christoph Loch</i>	
Introduction	153
Management quality improves value creation	154
Management quality model	156
Observations about management quality	160
Management quality trends	161
Implications for the management of healthcare provision	162
The phases of excellence	162
IEA process enablers	163
References	165
13 Management Quality in the AHPs and Evaluation Matrix	167
<i>Robert Jones and Fiona Jenkins</i>	
Introduction	167
Metrics	168
Key performance indicators	168
Business performance management	169
Lean thinking	169
Six Sigma	170
Total quality management	171
Benefits realisation	172
Clinical dashboard	172
Balanced scorecard	173

AHP Management Quality Evaluation Matrix	174	Empower others to act the vision	
Standard 1 strategy	175	Project execution	
Standard 2 activity	176	Plan and create short-term wins	
Standard 3 patient and service user experience	177	Consolidate improvements and keep momentum for change	
Standard 4 finance	178	Institutionalise the new approaches	
Standard 5 staff resources	180	Help! I have been put on a project....what do I do?	
Standard 6 staff management, education and development	181	How to structure a large project	
Standard 7 information and metrics	182	Conclusion	
Standard 8 leadership and management development	183	References	
Standard 9 clinical excellence	184	Further reading	
Standard 10 communication and marketing	185		
Standard 11 service improvement and re-design,	187	16 Marketing for AHPs	
Standard 12 risk management	188	<i>Julian Glover</i>	
Standard 13 corporate governance	189	Introduction	
Standard 14 top five key performance indicators	190	So, what is marketing?	
References	191	Customers	
		Customers or consumers?	
14 Evaluating clinical performance in healthcare services with data envelopment analysis	193	Requirements	
<i>Jon Chilingerian</i>		Goods and services	
Introduction	193	Profitability	
DEA methodology	194	Competition	
How DEA works	196	Competitive advantage	
Using DEA to benchmark clinical performance: three examples	199	Branding	
Hospital hip replacement teams	200	Brand definition	
Benchmarking cost effective physical, occupational and speech therapy	202	Brand awareness	
Evaluating and benchmarking cardiac surgeons	204	Branding and non-commercial organisations	
Summary and conclusions	207	Managing the brand	
A future agenda and new leadership challenge	208	Touch points	
References	210	Creating and managing touch points	
		What next	
15 Project management for AHPs with real jobs	212	Summary and conclusion	
<i>Janice E Mueller and Ian S Rowe</i>		References	
Overview	212	Further reading	
Why are projects so difficult?	212		
What is a project?	213	17 Effective report writing	
Project management and change management	214	<i>Julie Shepherd and Natalie Beswetherick</i>	
Before starting	215	Introduction	
Doing the right project	215	Background	
What to do and when to start	216	Planning the report	
Plan the project	217	Presentation of the report	
The plan	217	Example of a report in outline	
Risk register	217	Executive summary	
Issues register	218	Background	
Establish a sense of urgency	219	Methodology	
Form a powerful guiding coalition	220	Results and presentation of data	
Create a vision	220	Financial information	
Communicate the vision	221	Conclusion	

Recommendations	258
Appendices	258
Summary	258

18 Demonstrating worth: marketing and impact measurement – self-referral	264
<i>Lesley Holdsworth</i>	
What do we mean by marketing?	264
The growth of autonomous AHP practice	265
The pre-marketing phase	267
Marketing self-referral services	267
The internal focus	267
Intelligence gathering	268
Knowing your population	268
Why is this important?	268
Knowing your service	269
Preparing the workforce	270
The external focus	270
Who are ‘critical friends’?	270
The direct marketing phase	271
Publicising the service change	271
Marketing options	271
Targeting publicity	273
Publicising the service at launch	273
Measuring and demonstrating impact	273
Measuring impact	274
Information collection	274
Utilising information to demonstrate impact	275
Reporting impact results	275
Who is the ‘audience?’	275
What should be reported?	276
References	277
19 Improving access to services: a practical approach to understanding demand and capacity to support service re-design	278
<i>Zak Arif and Elizabeth Roberts</i>	
Re-designing the service	278
The present state	278
Staff workshops	279
Some reasons for poor access	280
Demand, capacity and patient flow	281
Demand	282
Capacity	282
References	283

Interview stakeholders	285
Principles of re-design	286
Instructive information	287
Objective outcomes	287
Reasonable referrals	288
Scheduling	288
Making it happen	288
Monitor and evaluate	289
References	289
