## Designing and Deploying RFID Applications

Radio Frequency Identification (RFID), a method of remotely storing and receiving data using devices called RFID tags, brings many real business benefits to today world's organizations. Over the years, RFID research has resulted in many concrete achievements and also contributed to the creation of communities that bring scientists and engineers together with users. This book includes valuable research studies of the experienced scientists in the

field of RFID, including most recent developments. The book offers new insights, solutions and ideas for the design of efficient RFID architectures and applications. While not pretending to be comprehensive, its wide coverage may be appropriate not only for RFID novices, but also for engineers, researchers, industry personnel, and all possible candidates to produce new and valuable results in RFID domain.

## Book contents

- Chapter 1 [Impacts of RFID on Business Models](#) by Ela Sibel Bayrak Meydanoğlu
- Chapter 2 [Commercial and Implementation Issues Relating to the Widespread Acceptance and Adoption of Radio Frequency Identification Technology](#) by Mark J. Rodrigues and Kieran James
- Chapter 3 [The Role of RFID Technology in Supply Chain Risk Management](#) by May Tajima
- Chapter 4 [Secure RFID for Humanitarian Logistics](#) by Gianmarco Baldini, Franco Oliveri, Hermann Seuschek, Erwin Hess and Michael Braun
- Chapter 5 [Applications of RFID Technology in the Complex Product Assembly Executive Process](#) by Huibin Sun
- Chapter 6 [Using RFID Technology for Simplification of Retail Processes](#) by Azra Bayraktar, Erdal Yılmaz and Şakir Erdem
- Chapter 7 [A Solution with Security Concern for RFID-Based Track & Trace Services in EPCglobal-Enabled Supply](#) by Wei He, Yingjiu Li, Kevin Chiew, Tiejian Li and Eng Wah Lee
- Chapter 8 [Discovery Services in the EPC Network](#) by Martin Lorenz, Jürgen Müller, Matthieu-P. Schapranow, Alexander Zeier and Hasso Plattner
- Chapter 9 [Advantages and New Applications of DHT-Based Discovery Services in EPCglobal Network](#) by Juan Pedro Muñoz-Gea, Pilar Manzanares-Lopez and Josemaria Malgosa-Sanahuja
- Chapter 10 [Application of RFID and Mobile Technology to Plaster Board Waste in the Construction Industry](#) by Lizong Zhang, Anthony S. Atkins and Hongnian Yu
- Chapter 11 [RFID-Based Equipment Monitoring System](#) by Mohd Helmy Abd Wahab, Herdawatie Abdul Kadir, Zarina Tukiran, Noraisah Sudin, Mohd Hafizz Ab. Jalil and Ayob Johari
- Chapter 12 [Developing RFID-Based Instruments Maintenance Management in Construction Lab](#) by Yu-Cheng Lin, Weng-Fong Cheung, Yi-Chuan Hsieh, Fu-Cih Siao and Yu-Chih Su
- Chapter 13 [What are Authentic Pharmaceuticals Worth?](#) by Matthieu Schapranow, Jürgen Müller, Martin Lorenz, Alexander Zeier and Hasso Plattner
- Chapter 14 [Security Control and Privacy Preservation in RFID enabled Wine Supply Chain](#) by Manmeet Mahinderjit-Singh, Xue LI and Zhanhuai LI
- Chapter 15 [An RFID-Based Anti-Counterfeiting Track and Trace Solution](#) by Ioan Ungurean, Cornel Turcu, Vasile Gaitan and Valentin Popa
- Chapter 16 [A Knowledge-Based Approach for Detecting Misuses in RFID Systems](#) by Gennaro Della Vecchia and Massimo Esposito
- Chapter 17 [A Study on Implementation and Service of Digital Watermark Technology Architecture for Distribution Management](#) by Manabu Hirakawa
- Chapter 18 [RFID Middleware Design and Architecture](#) by Mehdi Ajana El Khaddar, Mohammed Boulmalf, Hamid Harroud and Mohammed Elkoutbi

- Chapter 19 [\*\*A Study on the Influence of RFID Tagging on Circulation Services and Collection Management: a Case Study of the Taipei Public Library\*\*](#) by Shu-hsien Tseng and Chien-ju Chou
- Chapter 20 [\*\*The Right UHF RFID Tags for Libraries – Criteria, Concern and Issues\*\*](#) by Steve H Ching, Alice Tai, Henry Ip, Lau Lap Fai and Michael Cheng
- Chapter 21 [\*\*RFID- Application in Info-Documentary Systems\*\*](#) by Angela Repanovici and Luciana Cristea

# Start Your Own Book

If you are working on or planning a research project and you wish to publish your findings, we invite you to publish your work with us.

You can choose to publish your work as:

- A single-author monograph - a specialized scientific book written by one main author
- A multiple-author monograph - a scientific book written by more than one author
- An edited book - a research book in which each chapter is written by a different contributor and edited by an expert scholar
- Conference proceedings - a collection of selected academic papers that are presented in the context of an academic conference

All our publications are published online under the Open Access model. Open Access means that everything published by InTech is immediately available online for FREE. To start a publishing project with InTech, please fill in this [Publishing Proposal Form](#) and return it by email to Ana Nikolic, Head of the Acquisitions, at [publish@intechopen.com](mailto:publish@intechopen.com). The purpose of this form is to provide us with a general idea of your publishing proposal and present it to our Editorial Board for their consideration and approval. A decision will be sent within 30 days of receipt.

## **How does the process work?**

The book publishing process follows this procedure:

- Register on our web site
- Submit your chapter proposal online
- Your chapter proposal goes through editorial review
- You are notified as to whether your chapter proposal has been accepted or rejected
- You submit your full chapter
- Your full chapter undergoes a review by the Book Editor
- We send an invoice for payment of the Article Processing Charge (payable either by yourself or your organization)
- Your chapter undergoes typesetting
- We prepare the design and layout of the book
- We carry out the final technical check
- We send one hard copy of the book to the corresponding author
- In parallel with sending the hard copy, we release the online version of the book
