Preface

Welcome to the 2011 15th International Conference on Computer Supported Cooperative Work in Design (CSCWD2011).

Welcome to beautiful Switzerland. The 2011 edition of the CSCWD conference takes place at the Olympic Museum in Lausanne, the Olympic capital. The city of Lausanne is located at the shores of the lovely Lake of Geneva facing the magnificent alpine mountains. Its rich history goes back to the first settlements at ~6000 BC. Today, the city is an important economic center hosting many international enterprises. It is home to many educational institutions including the University of Lausanne and EPFL with more than 20,000 students following programs in all disciplines. The cultural life in the region is renowned to be very rich and features world famous performances such as those of B ejart Ballet or the Montreux Jazz Festival.

Design of complex artifacts and systems requires the cooperation of multidisciplinary design teams. The CSCWD 2011 conference provides a forum for researchers and practitioners involved in different but related domains to confront research results and discuss key problems.

The program committee has selected 129 papers during its review process that are presented and included in the proceedings. The exciting technical program is completed by three presentations of renowned key players in the area of computer supported cooperative work: Jean-Paul Barth es, UTC, France; Jean-Louis Ligier, Renault Group, France; and Naoufel Cheikrouhou, EPFL, Switzerland.

I would like to thank all the authors who submitted papers, and the program committee members for their careful reviewing work and program arrangement. I express particular gratitude to the chairs for their enthusiasm and invaluable help in preparing this conference. In particular, special thank goes to Michel Pouly, EPFL and his team who was responsible for the local arrangements.
