The inaugural Australian Equine Science Symposium arose from discussions that were held at the Magic Millions Thoroughbred sales in January 2006. Following initial support from RIRDC, a committee was formed and Equine Science 2006 planned.

The Committee hopes that the Symposium will become a biennial conference for equine scientists which:

- Promotes excellence in equine science
- Focuses on science, technology and innovation relevant to the Australian horse industry
- Provides a regular forum for exchange of research findings, ideas and information between Australian & New Zealand equine scientists and with their international colleagues
- Assists young equine scientists with their careers
- Encourages participation by members of the horse industry

Proceedings

Papers presented at this Symposium have been reviewed to meet editorial standards. However, the comments and views expressed in the papers are entirely the responsibility of the author or authors concerned.
