Where  Hong Kong, China

Call For Papers

Theme: "Fostering Innovation and Excellence in Engineering Education"

The IEEE International Conference on Teaching, Assessment, and Learning for Engineering (TALE) will be held each year in the Asia-Pacific region (IEEE Region 10) beginning in 2012. It is intended to complement existing conferences sponsored by the IEEE Education Society, most notably Frontiers in Education in North America (IEEE Regions 1-7) and EDUCON in Europe/Middle East/Africa (IEEE Region 8). The aim of TALE 2012 is to provide a forum for academicians and professionals from various educational fields and with cross-disciplinary interests to network, share knowledge and engage in dialogue around the theme of fostering innovation and excellence in engineering education. To this end, both research and practice-oriented papers are invited that encompass all aspects of education in the engineering fields (including computing, computer science, information technology and cognate disciplines). The conference will feature traditional paper presentations, workshops, as well as keynotes by renowned educational experts and authorities.

PAPER SUBMISSION, REVIEW, AND PUBLICATION

A blind-review process will be used to evaluate all submitted papers.
# TABLE OF CONTENTS

Multivariate Analysis for Students’ Evaluation of Teaching Effectiveness in Teleinformatics Engineering ................................................................. 1
  Thomaz E. V. Silva, F. Herbert L. Vasconcelos, Andre L. F. Almeida, Joao C. M. Mota

An Automatic Marking System for FOL to CF Conversions................................................................. 7
  Foteini Grivokostopoulou, Isidoros Perikos, Ioannis Hatziilygeroudis

Towards a Sustainable Assessment Strategy for Digital Forensic Education and Training .......................... 13
  Lei Pan, Nisar Khan

A Tutorial on Evaluation of Network Survivability under Sophisticated Attacker .................................. 19
  Frank Yeong-Sung Lin, Pei-Yu Chen

Teaching Introductory Electrical Engineering: Project-Based Learning Experience .................................. 22
  Chi-Un Lei, Hayden Kwok-Hay So, Edmund Y. Lam, Kenneth Kin-Yip Wong, Ricky Yu-Kwong Kwok,
  Cecilia K. Y. Chan

Helping First-Year Engineering Students in Transition: Promoting Transformative Learning in Student and Faculty Development .............................................. 27
  Frankie Leung, Edmond Ko, Tracy Chow

Toward Constructive Alignment with Portfolio Assessment for Introductory Programming ..................... 32
  Andrew Cain, Clinton J. Woodward

An Engineering Introductory Seminar Course for First-Year College Students ........................................ 39
  Fan Hehong, Dong Zhifang, Hu Guohua, Song Jing, Wang Qilong, Zhang Meng

An Analysis of Moodle in Engineering Education: The TAM Perspective ............................................. 43
  Hui Hui Chen, Ming Chee Lee, Yun Lin Wu, Jing Yao Qiu, Cheng He Lin, Hong Yong Tang

A Holistic Review of Cloud-Based E-learning System ........................................................................... 48
  Heba Fasihuddin, Geoff Skinner, Rukshan Athauda

Towards Semantic Learning Object Metadata: Mapping Standard Metadata ............................................. 54
  Qiyan Han, Feng Gao

Department Course Selection Problem: The Primitive Cognitive Network Process Approach ..................... 57
  Kevin Kam Fung Yuen, Manwai Yuen

An Advanced C Programming Course for the Embedded Systems Development ....................................... 60
  Ling Ming, Shi Longxing, Tang Yongming

A Hybrid Course Curriculum Design and Implementation Based on CDIO Approach to Engineering Education .................................................................................. 63
  Zhenli Yu, Hong Wu, Xiaoli Zhou

Excellent Engineer Cultivation Teaching Plan Exploration for Electronic Engineering Major .......................... 68
  Haibing Yin, Xia Min Wang, Zhelei Xia

Framing Core and Advanced Competencies for Courses: Does the Nature, Level, Complexity and Audience of a Course Matter? .............................................. 71
  Ilse Baumgartner, Venky Shankararaman

Computer Science Curriculum in a Liberal Arts Setting: Case Studies at the University of San Diego ............. 77
  Simon G. M. Koo

Towards Practical Education of Students through Local Contribution .................................................... 82
  Hideaki Funah, Yutaka Tange, Kenji Mihara

Inducing Students’ Intrinsic Motivation through Conceptual Learning in a Digital Circuit Class ..................... 86
  Kawan Soetanto, Mai Higuchi

Quadcopter Design and Implementation as a Multidisciplinary Engineering Course ................................ 92
  Igor Gaponov, Anastasia Razinkova

Construction Safety Education Model Based On Second Life .................................................................... 96
  Quang-Tuan Le, Chan-Sik Park

Experiences in Developing Mobile Educational Games ........................................................................... 101
  Angela Cartagena, Rowel Atienza, Tyrone Tai, Rica Cruz

Using Game-Based Learning in Teaching CS Algorithms ......................................................................... 104
  Ioannis Hatziilygeroudis, Foteini Grivokostopoulou, Isidoros Perikos

Interactive Study Method in Engineering Education Based on Animation Applet Design .......................... 108
  Jinsong Tao, Shujuan Zhang, Xiaohan Wen

Staff Exchange Teaching Model for an Offshore Campus ....................................................................... 112
  Alan J. Murphy, Ivan C. K. Tam
Teaching Notes of MVDR in Digital Signal Processing (DSP) - From MVDR to Semidefinite Programming (SDP) ................................................................. 116
Xiaosheng Guo, Qun Wan, Ying Zhang, Jin Liang

Faculty Development in Engineering Colleges in Mainland China: The Humanities Perspective ............................................................ 120
Hong Huang, Xiaoxiang Li, Yinghui Kuang

Tales from Inside the Blender – Five Models of Collaboration ................................................................. 123
Kim L. Blackmore, Malcolm Pettigrove, Paul Compston, Lauren Thompson, Diana Quinn, Anne Lonie

Extending Micro and Nanoelectronics Education through Integrated Online Microelectronics and Technology CAD Laboratory ............................................. 129
Ananda Maiti, Subhasis Mahata, C. K. Maiti

Application of Virtual Experiment in High-Voltage Engineering Education .................................................. 132
Jinsong Tao, Shijuan Zhang, Wei Zhang, Hui Zhang, Xishan Wen

Performance and Quality of Experience of Remote Access Laboratories ............................................... 135
Alexander A. Kist, Andrew Maxwell

Remotely Triggered Semiconductor Devices Characterization Laboratory in Cloud Environment ............ 141
Ananda Maiti

The Use of Wiki to Facilitate Critical Thinking ...................................................................................... 145
Goh Wei Wei

Using iPad 2 with Note-Taking Apps to Enhance Traditional Blackboard-Style Pedagogy for Mathematics-Heavy Subjects: A Case Study .............. 148
Alan Pak Tao Lau, Siu-lau Ho

Exploring Chinese through Learning Objects and Interactive Interface on Mobile Devices .................. 151
Vincent Tam, Nan Luo

m-LTE: A Mobile-Based Learning and Teaching Interactive Environment ............................................ 154
W. Yan, C. Li, J. Ma, S. Ma, H. Truong

Introductory Project in Electrical Engineering as a Tool to Improve Motivation among Second-Year Students ................................................................. 158
Aharon Gero

An Experimental Study of Engineering-Science-Mathematics Approach in Elementary Engineering and Science Education ................................................. 163
Eric Z. Ma, Edward W. Lo, Mansun Chan

Philosophy Thinking in the Teaching Application and Research of Engineering Drawing ....................... 169
Zhang Ruixun, Liu Lin, Wu Pingqing, Chen Liang

Research-Based Learning in Computing Courses for Senior Engineering Students ................................... 173
Khaled Bashir Shaban, Mahmoud Abdulwahed

an Experience of Teaching Industrial Automation for Industrial Engineering Undergraduate Students ................................................................. 180
Fabio Lima, Alvaro Camargo Prado, Alexandre Augusto Massote

Development of a Self-Management Mode for an Undergraduate Student Innovation Lab .............. 186
Yongming Tang, Xiaoyan Song, Xiaojian Zhang, Wei Lei

Energy Conservation Study on Induction Motors Using MATLAB/Simulink for Enhancing Electric Machinery Courses ................................................................. 189
Navneet Kumar, Thanga Raj Chelliah, S. P. Srivastava

Cultivating Power Converter Talents On Campus through the Design Methodology of Flyback Converter ........................................................................... 196
Tze-Yee Ho, Yuan-Joon Chen, Mu-Song Chen, Jia-Shen Lin

A System to Assist the Learning of Embedded Microprocessor Programming ........................................... 200
Yu-fai Fung, Shuyun Ren, M. Fikret Ercan

Live Peer Marking for HCI Design Education ............................................................................................ 203
Steve Bennett, Trevor Barker

Integrating the Kinect Camera, Gesture Recognition and Mobile Devices for Interactive Discussion .......... 210
Vincent Tam, Ling-Shan Li

Development and Evaluation of Open Educational Resources for Enhancing Engineering Students’ Learning Experience ........................................................................ 213
Mahmoud Abdulwahed, Zoltan K. Nagy, Adam R. Crawford

The Systematic Development of Rubrics in Assessing Engineering Learning Outcomes ....................... 218
Tracy Chow, Edmond Ko, Cindy Li, Catherine Zhou

Item Response Prediction for Incomplete Response Matrix Using the EM-Type Item Response Theory with Application to Adaptive Online Ability Evaluation System ........................................................................ 223
Hideo Hirose, Takenori Sakamura
