The increasing accessibility of digital technology has changed the way students locate and share information, manage data, establish networks and collaborate. However, has the prevalence of digital technology, web-based tools and advanced software created a complex research environment that is more exhausting than exhaustive?
Age of Higher Degree Students
Australia - 2012
Yeah?
So what?
60% of HDR students are over 29 years of age!!!
30% of PhD students are over 39 years of age!!!
work life balance
Can digital technology solve the problem?
The well-managed use of technology can help ...
Alleviate isolation

Access online resources

Act as a repository for resources

Support collaboration

Create a seamless learning space

Manage research data
