Collaboration: An Australasian Experience

Shayne Baker
the Philippines

- Population of 92 million
- Archipelago of 7107 islands
- Shared concern on drowning issue
- Proud history in Aquatics
- Significant child drowning problem
Philippine Life Saving Society

Philippine Life Saving Target is to develop within each household “One trained lifesaver”

• Part of overall strategy to educate the Filipino people about water safety, encourage greater supervision, prevent unplanned contact between children and aquatic environs, teach children to “Swim & Survive”
Everyone can be a lifesaver
Collaborative Model

- Key components of relationship include:
  - Mutual respect by both parties
  - Willingness to listen as a means of developing understanding
  - Regular, timely communication
  - Sharing approach to program outcomes
  - Common commitment to the ‘prevention of drowning’
Philippine Life Saving Society - Year End 2008
