Received 2016 April 6; accepted 2016 April 6; published 2016 May 12

In the original version of this manuscript, there was a mistake in compiling the list of contributing authors. Specifically, the contribution of D. Ciardi was mistakenly omitted. We here rectify this error and highlight the important contribution of D. Ciardi in the interpretation of the adaptive optics images of Kepler-167 to derive sensitivity curves and exclusion limits of nearby contaminating sources.
