8:00	Registration						
8:30	Opening Address	8:30	ICWL Keynote Speech by Prof. Myunghee Ju Kang Ewha Womans University, S. Korea	8:40 (100 min)	Session 13: ICWL8	Session 14: ICWL9	
8:45	ICWL Keynote Speech by Prof. Nadia Magnenat-Thalmann MIRALab, University of Geneva	9:30			Coffee-break	Security, Privacy and Networking Aspects for E-learning	Learning Resource Deployment, Organization and Management (I)
9:45	WBL Keynote Speech by Prof. Won Kim Sungkyunkwan University, S. Korea	9:50 (120 min)	Session 7: ICWL4		Session 8: WBL4	Chair: <i>Hua Wang</i>	Chair: <i>Gary Tam</i>
10:45	Coffee-break		Design, Model and Framework of E-learning Systems	Computer Supported Collaborative Learning	10:20	Break	
11:05 (80 min)	Session 1: ICWL1	11:50			Chair: <i>Judy Hardy</i>	Chair: <i>Joseph Fong</i>	10:40 (80 min)
	Collaborative and Mobile Learning		Lunch			Science Education	Learning Resource Deployment, Organization and Management (II)
	Assessment Strategy for Blended Learning					Chair: <i>Ralf Klamma</i>	Chair: <i>Jenny Fang</i>
	Chair: <i>Zhiting Zhu</i>				12:00	Lunch	
12:25	Lunch	13:20 (120 min)	Session 9: ICWL5	Session 10: ICWL6	Optional half-day tour: 13:30 ~ 19:00/21:00		
13:55 (100 min)	Session 3: ICWL2		Test Authoring, Question Generation and Assessment	Practice and Experience Sharing			
	Personalized e-Learning		Chair: <i>Giuliana Dettori</i>	Chair: <i>Marc Spaniol</i>			
	Learning Theories for Blended Learning	15:20	Coffee-break				
	Chair: <i>Howard Leung</i>		15:40	Session 11: ICWL7	Session 12: WBL5		
15:35	Coffee-break		~ 17:40 (120 min)	Visualization Technologies	Experiences in Blended Learning		
15:55 ~ 17:55 (120 min)	Session 5: ICWL3			Chair: <i>Taku Komura</i>	Chair: <i>Kenneth Lee</i>		
	E-learning Standards and Web-based Learning for Oriental Languages						
	Blended Learning Systems						
	Chair: <i>Frederick Li</i>						
	Chair: <i>Philips Wang</i>						
18:00 ~ 20:00	Reception	18:30 ~ 21:30	Conference Banquet				

Sessions' Location:

Registration: Concourse, Appleton Tower, University of Edinburgh.

Reception: Concourse, Appleton Tower, University of Edinburgh.

Conference Banquet: Scotsman Hotel, 20 North Bridge, Edinburgh.

Note: Posters are put up in the Concourse and poster presenters can show their work to the participants during the Reception on Day 1.

ICWL and WBL Keynote Speeches: Lecture Theatre 1, Appleton Tower.

Sessions 1, 3, 5, 7, 9, 11, 13, 15: Lecture Theatre 1, Appleton Tower.

Sessions 2, 4, 6, 8, 10, 12, 14, 16: Seminar Room 6, Appleton Tower.

Learning How to Dance Using a 3D Webplatform

Prof. Nadia Magnenat-Thalmann, MIRALab - University of Geneva, Switzerland
E-Mail: thalmann@miralab.unige.ch

15 August 2007, 8:45-9:45

Lecture Theatre 1, Appleton Tower

Abstract

Until recently dance was part of the physical education programme in many countries. It is now recognised as an art form comparable to music, drama, and visual arts and equally worthy of study.

The reasons include the lack of appropriate teaching resources that enable teachers/trainers to provide an integrated view of the movement and social aspects of dance as the limited use of new media that improve the attractiveness of dance resources to students.

We will present in this talk the WebDance European project and more particularly our contribution in 3D and Web technologies to create motion captured dances and a web 3D platform.

In the project WebDance, we can show, on the web, 3D simulation of various dances that allows teachers and trainers to use our platform to document traditional dance, understand in 3D how dancers are performing their art and later on, create dance lessons. The long term objective is also to create an online dance learning community.

Our web based application displays dance animations embedded in a web site. Currently, web based 3D applications are not heavily developed due to web limitations. But the combination between actual 3D engines and web technologies in terms of interface could provide acceptable 3D visualization. The most actual popular web browsers are Internet Explorer (www.microsoft.com) and FireFox (www.mozilla.com). These webbrowsers do not integrate any 3D engines yet. That is why we use it like an application container and we create dedicated plug-in. The graphics part is managed in a specific coding language (C++ is the most popular for computer graphics) and it is wrapped by the component interface. Mainly, the current component interfaces are coded in C++ and are called ActiveX in the Internet Explorer case and XPCOM in the FireFox case. Each one is designed to manage and interpret C++ coding. Consequently this application is coding into three parts, one is the core of the application and the two others are dedicated to interface web browser and the application core. Examples of how to learn through this platform will be shown.

Bio

Prof. Nadia Magnenat-Thalmann has pioneered research into virtual humans over the last 25 years. She obtained her PhD in Quantum Physics from the University of Geneva.

From 1977 to 1989, she was a Professor at the University of Montreal where she founded the research lab MIRALab. She was elected Woman of the Year in the Grand Montreal for her pionnering work on virtual humans and presented Virtual Marilyn at the Modern Art Museum of New York in 1988.

Since 1989, she is Professor at the University of Geneva where she recreated the interdisciplinary MIRALab laboratory. With her 30 PhD students, she has authored and coauthored more than 300 research papers and books in the field of modeling virtual humans, interacting with them and living in augmented worlds. She is presently taking part in more than a dozen of European and National Swiss research projects and she is the Coordinator of several European Research Projects as the Network of Excellence (NoE) INTERMEDIA, the Project HAPTEX and the European Research training Network Marie Curie 3D ANATOMICAL HUMANS. She is coordinating the Virtual Campus Swiss project "Understanding 3D" and is working also for the European Project Webdance.

She is editor-in-chief of the *Visual Computer Journal* published by Springer Verlag and co-editor-in-chief of the journal *Computer Animation and Virtual Worlds* published by Wiley. She also participated to political events as to the WORLD ECONOMIC FORUM in DAVOS where she was invited to give several talks and seminars on the importance of multimedia for society.

Towards a Definition and Methodology for Blended Learning

Prof. Won Kim
School of Information and Communication Engineering,
Sungkyunkwan University, Suwon, S. Korea
E-Mail: wonkim@skku.edu

15 August 2007, 9:45-10:45

Lecture Theatre 1, Appleton Tower

Abstract

Blended learning is known roughly as combining the traditional instructor-led classroom learning and technology-based e-learning. Although there have been attempts to define the term blended learning, and to understand how to make blended learning work best, considerable further research and experimentation are needed. This paper offers a precise definition of blended learning and blended learning program, and proposes a methodology for making blended learning work best.

Bio

Dr. Kim is a Senior Advisor with Samsung Electronics, Suwon, Korea, since November 2004. He is also a Distinguished Visiting Professor in the Department of Computer Engineering at Sung- Kyun-Kwan University, Suwon, Korea since September 2005. He received a Ph.D. degree in Computer Science from the University of Illinois in Urbana-Champaign. He received both a BS and an MS degree from MIT. He has published 5 books and 153 research and technical papers in international journals and conferences on the area of database, data mining and Internet technologies.

Dr. Kim was the Founder and CEO of Cyber Database Solutions, Inc. in Austin, Texas from 1996 to 2004. He was, at the same time, a Dean and Distinguished Professor of Computer Science at Ewha Women's University in Seoul, S. Korea from 1999 to 2004. From 1990 to 1996, he was the Founder and CEO of UniSQL, Inc. that created the world's first commercial object-relational database system. From 1984 to 1990, he was the Director at Microelectronics and Computer Corporation that created one of the world's first object-oriented database systems. He was a Research Staff Member at IBM Almaden Research Center from 1980 to 1984.

Dr. Kim is the Founder and Editor-in-Chief for *ACM Transactions on Internet Technology* since 2000. He has been elected an ACM Fellow in 1995. He was the Founder and Chair of the ACM Special Interest Group on Knowledge Discovery and Data Mining from 1998 to 2005. He was the Chair of the ACM Special Interest Group on Management of Data from 1989 to 1997. He served as the Editor-in-Chief for *ACM Transactions on Database Systems* from 1992 to 2001.

Dr. Kim received the ACM 2001 Distinguished Services Award for his contributions in computing research. In 2002, he received the ACM SIGMOD "Test of Time" Award for the most influential research paper in 1992. In 1998, he received the ACM SIGMOD Contributions Award for his outstanding contributions to ACM SIGMOD and the database management research community. In 1995, he received the VLDB "10-Year Paper Award" in 1995 for the most influential research paper in 1985.

eQA Model: A Wholistic Approach to e-Learning Quality Assurance

Prof. Myunghee Ju Kang
Ewha Womans University, S. Korea
E-Mail: mhkang@ewha.ac.kr

16 August 2007, 8:30-9:30

Lecture Theatre 1, Appleton Tower

Abstract

"Is e-Learning effective?" "Does it produce actual learning and right performance?" "Is there a positive return on investment?" These are some common questions for those of us who are currently involved in the field of e-Learning.

eQA (e-Learning Quality Assurance) model focuses on the process as well as outcomes of e-Learning. It ensures the quality of 'e (electronics)' learning environment by monitoring the whole process and product quality from planning, designing, developing, implementing and to evaluating the contents, solution, and service. It also integrates the learning process as well as outcome quality measurement scales into 'e' environment by monitoring before, during and after the e-Learning. eQA model was also designed to be self-growing and adjusting to various needs of different institutions, key stakeholders and technology advancement.

In the presentation, the wholistic framework of theory based eQA model, all elements in it with their relationships and measurement scales and rubrics to assure e-Learning quality with multi dimensional plains, process and products of learning environment and learning itself will be explained. Furthermore, QA system developed by Korean government based on the model will also be demonstrated.

Bio

Prof. Myunghee Ju Kang obtained her PhD in Instructional Systems Technology from Indiana University, Bloomington, Indiana in 1984. Since 1992, she is a Professor at the Educational Technology Department of Ewha Womans University, Seoul, Korea. She currently is also the president of Korean Society for Educational Technology since 2007 and until 2008. Before taking this role, she was the director of Ewha Multimedia Education Institute from 2005.
