**International Conference on Challenges in Environmental Science and Computer Engineering**

Remediation of Diesel-contaminated Soil by Bioventing and Composting Technology ................................................................. 3

*Lihua Mao and Qinyan Yue*

Evaluation and Analysis of Eutrophic Levels in Nansihu Lake ............................................................... 7

*Yang Liyuan and Li Yanhong*

Electronic Toll Collection System Based on Global Positioning System Technology ................................................................. 11

*Saijie Lu, Tiejun He, and Zhaohui Gao*

Study on Usage of Expansive Concrete in Concrete Filled Steel Tube ......................................................... 15

*Li Yancang, Wang Fengxin, and Chen Yin*

New Corrosion Resistance Bar in Sandwich Wall ..................................................................................... 18

*Li Yancang, Ge Xiaohua, and Wang Fengxin*

IT Investment Efficiency Analysis of Equipment Manufacturing Industry Based on Two-stage Nonparametric Model ........................................................................................................ 21

*Wei Guo, Nan Zhao, and Hongyu Shao*

An Algorithm for Automated Sea Routing Design Base on Electronic Chart ......................................................... 25

*Jianbo Xu and Zhenhua Liu*
Study on Clogging Mechanism and Control Methods of Artificial Recharge ........................................29
Xueyan Ye, Xinqiang Du, Shengtao Li, and Yuesuo Yang

An Immune Danger Theory Inspired Model for Network Security Monitoring .................................33
Feixian Sun, Xinchao Han, Jianhong Wang, Feixian Sun, Xinchao Han, and Jianhong Wang

Growth Mode of Circular Economy ........................................................................................................36
Li Chuang

Research on the Problems and Countermeasures of China’s Public Crisis Management ..............40
Wang Li-ping

Enhancing Enzymatic Digestibility of Wheat Straw by Ethanol Cooking Pretreatment ..................44
Peng Luo and Zhong Liu

Bioethanol Production Based on Simultaneous Saccharification and Fermentation of Wheat Straw .................................................................48
Peng Luo and Zhong Liu

Utilization of Wheat Straw in Manufacture of Particleboard ..............................................................52
Peng Luo and Chuanmin Yang

The Experimental Study of the Quasi Continuous Plant Tissue Local Optical Absorption Character ..................................................................................................................55
Liu Hui-lan

Clover Leaves’ Delayed Luminescence Characteristic under Excitation of Alternating Electric Field ..................................................................................................................................59
Liu Hui-lan

FPGA Implementation of SHA-224/256 Algorithm Oriented Digital Signature ......................................63
Yang Jun, Ding Jun, Li Na, and Guo Yixiong

FPGA-Based Design and Implementation of Reduced AES Algorithm ...............................................67
Yang Jun, Ding Jun, Li Na, and Guo Yixiong

CPLD-Based Implementation of Computer Bus RAM ..............................................................................71
Yang Jun, Ding Jun, Li Na, and Guo Yixiong

Influence Analysis of Groundwater Seepage on Energy Conservation of Ground Source Heat Pump ................................................................................................................75
Zhonglun Zhang, Yanqiang Di, Tao Meng, and Miao Zhang

Research for D Stability of Uncertain Discrete Time-delay Systems .....................................................79
Lejiang Guo and Fangxin Chen

Concentrations and Distribution of Heavy Metals in South Taihu Lake ...........................................82
Binghong Cheng, Yanling Qiu, Li Li, Zhiliang Zhu, Jiang Chen, Xiaohong Yang, and Yuxin Yao

Carbon Dioxide Emissions in Chongqing Industry Sector - Base on Input-Output Analysis .............85
Xin-li Mou, Yan Cheng, and Chuan Fu
Vector Control Speed of EV AC Motor Based on TM320LF2407A .........................................................89
Wan Xiao-feng, Xiao Jing, and Hu Hai-lin

Mobile Peer-to-Peer Technology Used in Water Resources Management ..............................................93
Liang Ye

An Algorithm of Constructing Certificates Chain for Trusted P2P Network .............................................97
Yin Hui, Liu Jicheng, Wang Yuhua, and Zhang Dexian

A Digital Watermarking Algorithm for Vector Map ..................................................................................101
Feng-juan Cheng, Hui Yin, Xue-ping Zhang, and De-xian Zhang

Research of Accurate Software Timing Based on Windows .................................................................104
Feng-juan Cheng, Hui Yin, Qing-hui Zhang, and De-xian Zhang

A Method of Time-frequency Analysis Based on Empirical Mode Decomposition ......................................107
Hou Yanfang and Tian Hui

Removal of As(III) and As(V) from Drinking Water by Nanoscale Zero-valent Iron .................................111
Yuanying Huang, Keyan Tan, Qifeng Tang, Fei Liu, and Dandan Liu

The Study of Acquisition Technology in the Grossness Field Inspection System of Stored-Grain .............115
Liang Yi-tao, Zhang De-xian, Fu Hong-liang, Fan Chao, and He Lian-lian

The Primary Ecological Problems and their Evolution Analysis of Bohai Sea in 2008 ..........................119
Jianqiang Yang, Honghua Shi, Aijun Zhang, Hongliang Zhang, and Wenlin Cui

Several Views on the Study of Evaluation of Marine Ecosystem Health in China ...................................124
Honghua Shi, Wei Zheng, Dewen Ding, and Jianqiang Yang

Cluster Analysis on the Phytoplankton Distribution in the Front Sea of Qingdao ......................................128
Jianqiang Yang, Xianxiang Luo, Honghua Shi, Hongliang Zhang, and Aijun Zhang

Chlorophyll-a Spatial Distribution in Bohai Sea from 2006 to 2007 II - The Whole Bohai Sea ...............133
Jianqiang Yang, Honghua Shi, Aijun Zhang, and Yu Leng

Chlorophyll-a Spatial Distribution in Bohai Sea from 2006 to 2007 I - Six Important Regions ..................138
Jianqiang Yang, Xianxiang Luo, Honghua Shi, and Yu Leng

Technology of Extracting Luteolin from Solid Waste of Peanut Hulls ..................................................142
Wu Chun, Chen Lingling, and Chen Shujuan

Study on Immobilization Activated Sludge by Polyvinyl Alcohol-sodium Alginate - Calcium Nitrate in Domestic Sewage Treatment ..........................................................146
Nie Qian, Jian Peichao, Liu Zhibin, and Gu Fang

Wuwei Li and Yueru Wei

Colonization of Biological Activated Carbon in Drinking Water Purification .............................................. 220

He Wang, Zhonglin Chen, Jimin Shen, Feifei Xiang, Yu Liu, Xu Zhai, and Yue Liu

Research and Implement the Algorithm of Image Retrieval Based on the Multi-features .......................................................... 224

Guo Xiaojuan, Zhu Yanli, Wang Yufen, and Cheng Jifu

Simulation of Groundwater Contamination in Ningzhuang Coalmine, China ............................................... 228

Donglin Dong, Wenjie Sun, and Zengjiang Qian

Treatment of Wine Distillery Wastewater Using an Anaerobic Moving Bed Biofilm Reactor with Low Density of Polyethylene Support ...................................................................................... 232

Chai Sheli and Rene Moletta

Parametric Design Based on Building Information Modeling for Sustainable Buildings .......................................................... 236

Jialiang Wang, Jing Li, and Xi Chen

Adsorption of Nickel in Water by Brown Algae: Laminaria Japonica and Undaria Pinnatifida .......................................................... 240

Gong Zheng-jun, Zhang Zhi-peng, Chen Yu, and Wang Dong-mei

The System Analysis of Solar Inverter Based on Network Controlling .......................................................... 243

Huanqi Tao, Gujing Han, and Min Zou

The Effects of Water Recharge on Wanghe Groundwater Reservoir ...................................................................................... 247

Liu Ben-hua, Wang Wei-ping, and Lv Gao-feng

Intrinsic Vulnerability Assessment of the Confined Aquifer on Yinchuan Plain .......................................................... 250

Liu Ben-hua, Chen Hong-han, and Liu Ming-zhu

Motion Control and Retrieval Based on User Feedback Information ...................................................................................... 254

Jian Xiang

Study on the Communication from the Households in the Countries of West China Based on the Rural Telecom Communication Charge ...................................................................................... 257

Boli Wang, Xiaolei Zhang, Bing Zhu, and Changlong sun

A Security Architecture for Wireless Mesh Network ...................................................................................... 263

Na Wang and Hengjun Wang

Urban Ecosystem Health Evaluation Based on Set Pair Analysis: A Case Study on Chongqing City ...................................................................................... 267

Xiaoayan Tao

Application of Risk Management in Mutual Insurance ...................................................................................... 271

Zhang Xiaoyu

The Realization of Integration for Business Intelligence between SQL Server 2005 Reporting Services and Office SharePoint Server 2007 ...................................................................................... 274

Dongyun Wang

Message from the CESCE 2010 Conference Chairs

CESCE 2010 Conference will be held in Wuhan, China, March, 2010. We are delighted to invite you to participate in 2010 International Conference on Challenges in Environmental Science and Computer Engineering (CESCE 2010) in Wuhan, China, March 6-7, 2010. The objective is to provide a major interdisciplinary forum for the presentation of new approaches from relevant fields of environmental science, to foster integration of the latest developments in scientific research into engineering applications, and to facilitate technology transfer from well-tested ideas into environmental engineering, environmental sustainability, geoscience, GIS/RS, information technology, and computer sciences. The conference will continue the excellent tradition of gathering world-class scientists, engineers and educators engaged in the fields of geoscience and remote sensing to meet and present their latest activities.

The 2010 International Conference on Challenges in Environmental Science and Computer Engineering is co-sponsored by Intelligent Information Technology Application Research Association, Hong Kong, Asia Pacific Environmental Science Research Center, Hong Kong, Engineering Technology Press, Hong Kong, Engineering Technology Press, Hong Kong. Much work went into preparing a program of high quality. We received about 780 submissions. Every paper was reviewed by 3 program committee members, about 265 were selected as regular papers for CESCE 2010, representing a 33 % acceptance rate for regular papers.

The purpose of CESCE 2010 is to bring together researchers and practitioners from academia, industry, and government to exchange their research ideas and results and to discuss the state of the art in the areas of the conference. In addition, the participants of the Conference will have a chance to hear from renowned keynote speakers.

We thank Miss Silvia Ceballos, the production supervisor of IEEE Computer Society Press, USA, who enthusiastically supported our Conference. Thanks also go to Bob Werner for his wonderful editorial service to this proceeding. We would also like to thank the program chairs, organization staff, and the members of the program committees for their hard work. Special thanks go to IEEE Computer Society.

We hope that CESCE 2010 will be successful and enjoyable to all participants. We look forward to seeing all of you next year at the CESCE 2011.

Qi Luo, Intelligent Information Technology Application Research Association
CESCE 2010
Organizing Committee

Honorary Chair
Yijin Wu, Huazhong Normal University, China

General Co-chairs
Xuelei Wang, Institute of Geodesy and Geophysics, Chinese Academy of Sciences, China
Yun Du, Institute of Geodesy and Geophysics, Chinese Academy of Sciences, China
Aiwen Lin, Wuhan University, China

Program Committee Chairs
Changan Li, China University of Geosciences (Wuhan), China
Zhihua Shi, Huazhong Agricultural University, China
Enhua Li, Institute of Geodesy and Geophysics, Chinese Academy of Sciences, China
Feng Xiong, Asia Pacific Environmental Science Research Center, Hong Kong
Xinqi Zheng, China University of Geosciences (Beijing), China
Honghua Tan, Wuhan Institute of Technology, China
Qihai Zhou, Southwestern University of Finance and Economics, China
Yan Li, Huazhong Normal University, China
Dehuai Zeng, Shenzhen University, China

Publication Chairs
Qi Luo, Intelligent Information Technology Application Research Association Chair, Hong Kong
Feng Xiong, Intelligent Information Technology Application Research Association Chair, Hong Kong
Jia Luo, Engineering Technology Press, Hong Kong

Academic Committee
Prof. Chin-Chen Chang, Feng Chia University, Taiwan
Prof. Xuelei Wang, Institute of Geodesy and Geophysics, Chinese Academy of Sciences
Prof. Yijin Wu, Huazhong Normal University
Prof. Enhua Li, Institute of Geodesy and Geophysics, Chinese Academy of Sciences
Prof. Jason J. Jung, Yeungnam University, Republic of Korea
Prof. Xinqi Zheng, China University of Geosciences Beijing
Prof. Dehuai Zeng, Shenzhen University, China
Prof. Paul Davidsson, Blekinge Institute of Technology, Sweden
Prof. Cao Longbing, University of Technology Sydney, Australia
Prof. Qihai Zhou, Southwestern University of Finance and Economics, China
CESCE 2010 Reviewers

Xuelei Wang, Institute of Geodesy and Geophysics, Chinese Academy of Sciences, China
